SHELTER

The Problem, Who is affected, & why it needs to be solved.

TRANSPARENCY - Current system lack transparency on where the donations are going or if its given to the right people.

COORDINATION - Traditional systems lack coordination, has slow response & easily disrupted by bad actors compared to web3 counterparts.

SPECIFIC NEEDS - Precision is key when each & every resource is vital. But not everyone needs the same thing & it is hard to know "who needs what & where? When the needs are changing every time".

Hacks & Cyber Attacks - Relief & Government websites are being hacked & Denied-of-Service amidst the war.

Solution

SHELTER

A secure, immutable & decentralized platform that aims to maximize & further improve the impact of our humanitarian relief effort. It uses a *BLOCKCHAIN-BASED TICKETING SYSTEM* that lets people affected by the war in Ukraine connect,exchange & get donations directly from people that wants to help.

EXCHANGE
Connect & Exchange essential items with organization or individuals peer-to-peer.

COLLABORATE
Organizations around the world with same goal could collaborate to maximize impact of relief operations.
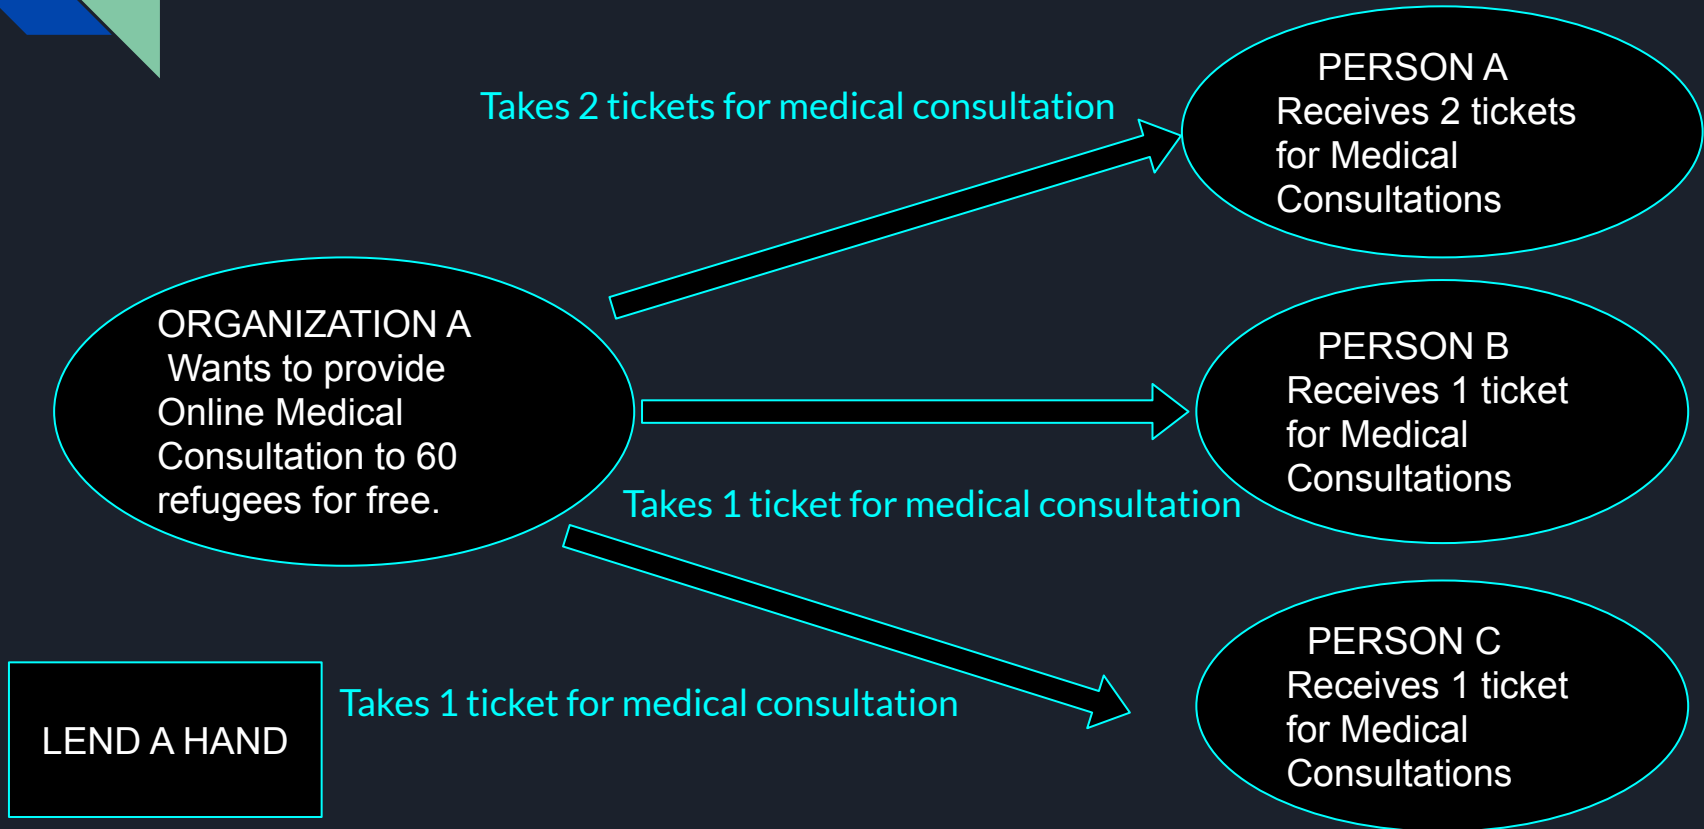

ORGANIZE
Event organizers could use Shelter to organize both online & offline humanitarian events..

How it works

PERSON B
Donates 15
Cartons of Milk

15 Cartons of Milk

PERSON A
Needs 50
Cartons of Milk

PERSON C
Donates 15
Cartons of Milk

15 Cartons of Milk

CALL FOR   HELP

PERSON D
Donates 20
Cartons of Milk

20 Cartons of Milk

How it works

Takes 2 tickets for medical consultation

PERSON A
Receives 2 tickets for Medical Consultations

ORGANIZATION A
Wants to provide Online Medical Consultation to 60 refugees for free.

PERSON B
Receives 1 ticket for Medical Consultations

Takes 1 ticket for medical consultation

PERSON C
Receives 1 ticket for Medical Consultations

LEND A HAND

Takes 1 ticket for medical consultation

Our Product

- Post items that you NEED so others could help you.
- Post items that you're willing to GIVE so those in need could take it.
